PUF Insulated Prefabricated Structures
Porta Cabins / Container Offices
Light Gauge Steel Frame Buildings (LGSF)
Mezzanine System

The state-of-the-art manufacturing facilities in Ranea Enterprises are home to one of the best trained crews in structural steel Fabrication in the Punjab . Ranea Enterprises is a top-notch Pre-engineered building manufacturers in India. We have proven track record of saving our customers' money as well as time when we are included in the early stages of a project as we can leverage our past project experience to provide a thorough project analysis. We are able to detail, fabricate and erect a wide range of steel fabrication in Northern Region of India. We have a team of highly skilled, enthusiastic engineers and designers, who excel in steel fabrication in India. Ranea Enterprises has grown to become one of the major steel construction companies in Punjab region.

Ranea Enterprises, a pioneer in the field of steel construction and even those who are on the lookout of value added steel construction services can benefit significantly from our services.

The experiences we have managed to reap over the years have helped us considerably and we are hopeful that the blend of experience and expertise will cement our position as the leading steel contractors in India.

Best Steel Construction Company

We carry out diverse kinds of large engineering services and are therefore hailed to be an ace structural steel fabrication companies in northern India. There are different types of structural steels and we make sure to excel in every phase of the development process. From managing the project to coordinating things, reporting every aspect, controlling cost, and even after sale maintenance, Ranea Enterprises is the numero uno choice when you are looking for structural steel fabricator in India.

We carry out excellent work of steel fabrication in India and make it a point to thoroughly inspect every aspect of steel making process and this helps us to be sure that the end products are one of the very best that you will find. We believe that it is the best quality of services that makes us stand out in the field of steel construction. We take every detailing seriously and want to make sure that our end products adhere to the best of quality standards, and thereby help in improving our reputation.

It is owing to the excellent quality of products that we offer that we have emerged as the leading steel construction companies in north India. We can proudly say that we are the best steel fabrication companies India. We make sure that our staff are well trained and adhere to the right guidelines and standards. So, if you are looking for value added steel constructions services or any other steel construction; make sure to get in touch with us right away.

Who We Are

Ranea Enterprises is a leading steel building manufacturer and installer. Ranea Group was created to provide all the bells and whistles for your steel building. Therefore, Ranea Enterprises is where quality is never sacrificed, and the customer experience is priority. With over 100's of satisfied customer reviews, we are determined to provide the ultimate customer experience!

Ranea Enterprises provides:

- Versatile accessories
- Priority delivery service
- Top-quality material
- Industry's leading customer experience

Company Overview

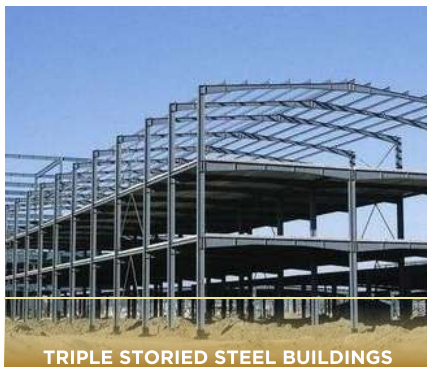

Ranea is a team of qualified, experienced and dedicated management professionals who have strong capabilities & rich experience of providing engineering solutions from Concept to Commission in to the fields of Pre-fabricated construction at the optimum cost with utmost customer satisfaction.

Pre-fabricated Construction is one of the fastest growing industries in the world today. We are determined to mark our footprint on the global prefab construction market and tap into every possible resource we come across, to live in a better world where we rely on nature & resources to meet our requirements and thus build a future for our coming generations to cherish.

Ranea has carved a niche in the domain of manufacturing & Supplying finest quality Porta cabin, MS Container office, Site office, MS Structure, Cold Room, PUF Panels & labor camp etc. Besides, our range of product is in compliance with varying industrial standards. Value Engineering, Quality Management, Expertise in Pre-Fabricated structures makes Ranea a turnkey solution provider in the infrastructure space.

Quality is the prominent factor that makes us reputed business organization, therefore we direct all our efforts towards maintaining the consistency in the quality of our entire range. Further, this qualitative range of products is delivered to customer within the stipulated time period. The prime concern of our organization is to attain optimal client satisfaction through all our endeavors. Keeping the individual demand of our clients in mind, our experts develop offered range as per the specifications proposed by them. Owing to our transparent business dealings and ethical trade policies, our esteemed clients have full faith in us. In order to gain optimal satisfaction of clients, we offer our exclusive range at affordable rates.

Our Product Range

Ranea – Designing Your Dreams, Building Your Future

Pre-engineered Building

Ranea - Pre Engineered Buildings Manufacturer offers customers freedom from complexity of building a shed. It offers one stop solution to clients, Starting from designing to commissioning. Ranea team of Professional engineers provides its customers economical and durable building solutions. Customers can focus on their core business once they handover their project construction responsibility to Ranea.

Our Pre Engineered Buildings are designed using the latest national and international design codes and standards for the most optimum functionalities. We use high grade steel products with full traceability, which goes through QC before production. The Manufacturing facility confirms to the IS welding codes and quality assurance plans (QAP). The dedicated team of logistics partners ensures on time delivery & our executions team ensures timely and safe commissioning of PEB Buildings.

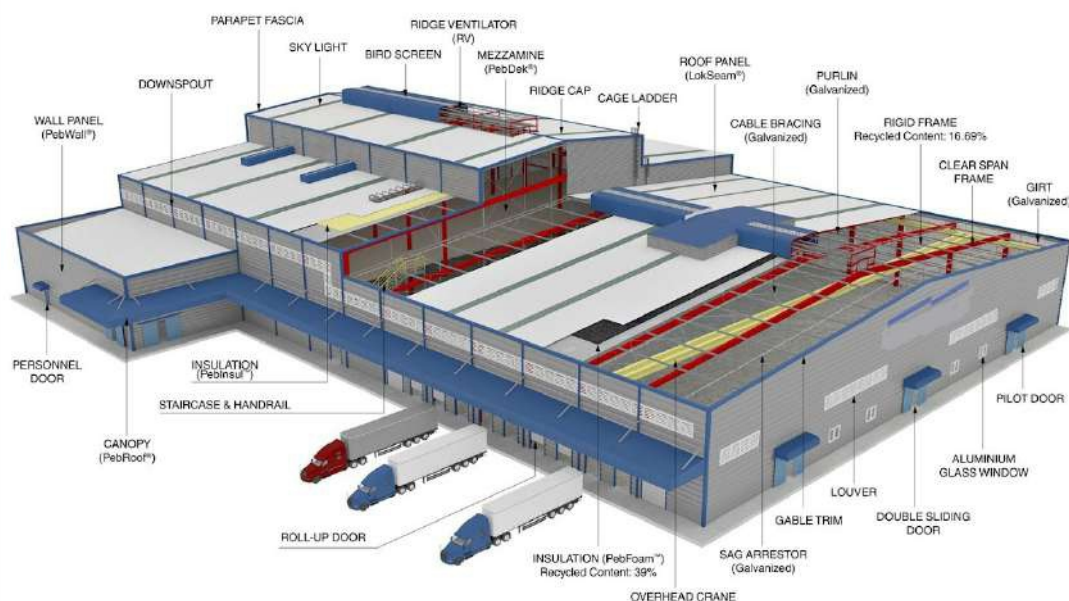

It is one of the light weight building systems that is used on the roof-top mostly in residential houses, sheds, hospitals, schools, offices and other places. The steel sections from which these sheds are made of are pre-galvanized to make it durable, strong and fire resistant.

As a Pre Engineered Buildings Manufacturer in India we make the installation of these systems quite easy because all the components and parts are assembled using nuts and bolts. Less skilled labors and workers can also do the installation work. Due its light weight it saves the high foundation cost, moreover it can be transported easily to any location

Ranea Pre Engineered Steel Buildings is the largest PEB manufacturer in Northern India. Our Pre Engineered Metal Buildings Projects have been used in all segments and almost all the regions of the country. We have projects in Sri Ganganagar - Rajasthan, Parala - Himachal Pradesh, Una - Himachal Pradesh, Ambala - Haryana, Bathinda - Punjab.

Advantages Of Ranea Pre Engineered Building (PEB)

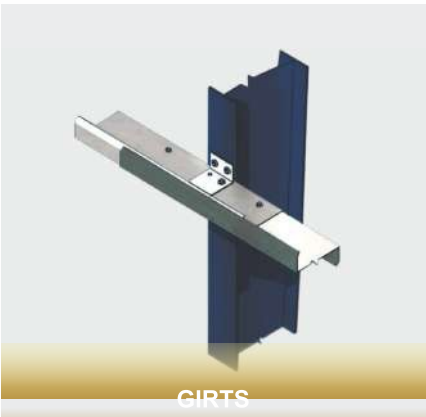

- Single Source Responsibility
- Reduced Construction Time
- Large Span Buildings
- Quick & Easy Installation
- Economical
- Quality Controlled Product

Technology & Design

Prefab Building Systems

RANEA uses the best dry technologies, already tested and available on the market, to design modular buildings with standard components. The structural components of the floor, wall and roof are totally prefabricated by RANEA as we are experts in the processing, with numerically controlled machines, and assembly of the materials.

The Building's Configuration

RANEA ENTERPRISES promotes modularity in the construction sector: buildings will be no longer designed, but configured with standard components, that are produced in the factory. The shape, the function and every surface, internal and external, are customizable: there are no limits to the imagination.

Any prefab component is delivered directly to the construction site and installed rapidly; thanks to an error-proof joint systems and mechanical fastenings. It is essential to involve any specialized actor, in order to guarantee environmentally friendly products, quick mounting, design and high quality buildings.

Every layer of the modular panel is designed with the perspective of a mass production: the purpose consists of reducing as more as possible the number of processes carried out on-site, to manage them directly into the factory (off-site). A modern production implies also material trace-ability, high precision, reliable costs and brief delivery times

- The dimensions of the modular panels are optimized, so that they can be loaded into a standard truck or container. This means RANEA can ship its products, across the country.
- Installation of the building is hassle free and easy to assemble. This is the prime reason for the acceptance of these buildings.

PRODUCTION

TRANSPORTATION

INSTALLATION

PUF Panel

PUF Panels are factory made Insulated roofing cladding panels. It is the easiest insulation system to install with minimum expertise needed. In this system rigid PUF is used as the insulation material in between two metal sheets. The PUF itself sticks to the two covering metal sheets during the manufacturing process. Its rigid structure provides stability to the entire panel. It is aesthetically pleasing as it provides a clean finish after installation.

Customer has the option to choose from various types of insulation based on their need of sound and heat insulation. Namely

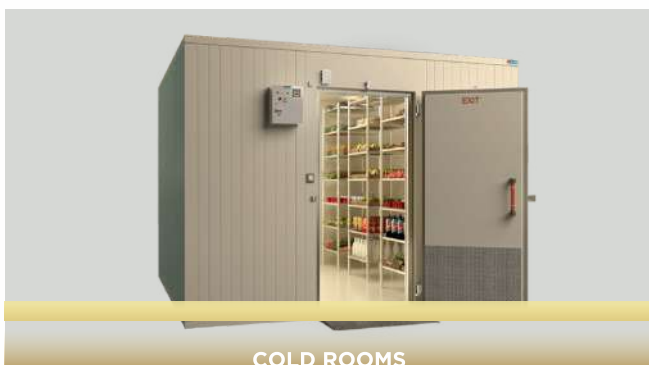

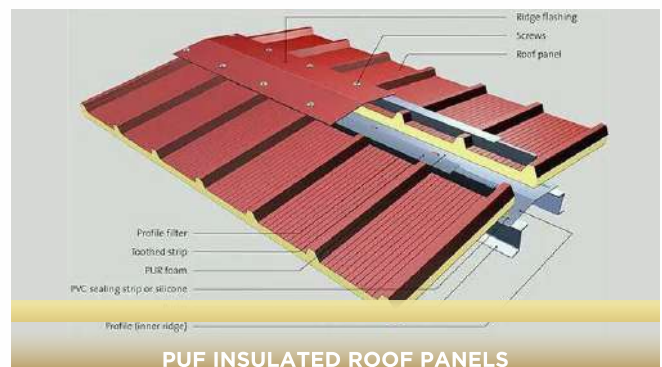

Rock wool | Glass wool | Bubble Wrap | Cross Linked Polyethelene | PUF or Polyurethane Foam etc.

The prefabricated structures manufactured by Ranea Enterprises are:

- Insulated PUF Panel Shelters
- Cement Board Shelters (EPS Panels)
- Portable Bunk Houses

Advantages of Prefab Accommodation

- The structures can be built in less than 25% of the time it takes for a similar building in conventional construction.
- The cost of prefab construction is less than the cost of conventional construction.
- Structures are insulated and provide protection against both hot and cold weather conditions.
- They can be shifted from one place to another as per requirement
- These structures are waterproof, termite proof and fire retardant.
- These structures are especially useful in inaccessible areas where conventional construction is not possible.
- They can be easily altered/ modified at a later date as per requirement.
- These structures can be safely used in earthquake prone areas.

Porta Cabins / Container Offices

Find the best Porta Cabin for several uses with Ranea. We are the leading manufacturer and provider in India as well as mainly in Northern belt. With rapid speed of changing world everybody needs to step in the foot in order improvise lifestyle as well as work preferences. That's why Porta cabins are trending in right way in the order of changed lifestyle. We are working to deliver you the best quality manufactured stuff to let you invest ones and enjoy long way. The Portacabins can be used for various purposes, it can be for home use, office use, and project office or for site office.

Does your business demand mobility? Seeking for a Prefabricated Site office? You have landed on right portal. Ranea is one of the best-prefabricated Marketing Office providers who brings the best quality manufactured products in market. We are not limited to provide the site office, you can hop in for the prefabricated buildings, clean room and prefabricated structures for different purposes. As for now you want to buy the marketing office. Your all questions will be answered here that why you should buy a site office for your business and how it can help you to grow your business too. As well as why you should buy Site Office in India from Ranea.

Ranea offers the complete turnkey solution under one roof right from designing, manufacturing till execution which offers a ready to move in solution for your construction sites.

Mezzanine System

MEZANINE FLOORING TO SAVE YOUR SPACE

Mezzanine System developed by Ranea Enterprises is becoming a necessary component for almost all Pre Engineered Buildings. The growing cost of land has further enhanced the need of mezzanine structure. We can make these mezzanines in multiple levels and can also make them load bearing to suit any load of production or storage need. We make the mezzanines by the following two systems

Deck Sheet Flooring (with RCC)

Deck Sheets are the preferred choice of flooring not only in steel buildings but also RCC buildings. It is a permanent shuttering over which RCC floor can be casted with less reinforcement steel and mortar. The best part is that with RCC on the top gives the client the option to finish it with any type of flooring material viz marble, cotta stone, tiles, epoxy, wood etc.

Chequered Plate Flooring

Chequered plate is the lightest form of flooring used in Steel structures. It is preferred in places where RCC floor construction is not possible or economical. It is recyclable and can be sold after it has served its function. It has a few drawback when compared to RCC flooring- a) makes noise b) vibrates c) Requires maintenance of surface coating which wears out overtime with usage
